Third International Conference on Urban Health

hosted by Northeastern University on October 20-22, 2004.

As the official meeting of the International Society for Urban Health, this year's conference continued to build on the success of the previous two ICUH conferences in Toronto and New York City. As in previous years, there were a wide variety of sessions and presenters who highlighted the full range of urban health issues. This year there were over 550 conference participants, 120 poster presenters, and close to 200 session speakers. We were very pleased that so many presenters and speakers from overseas were able to attend. We were also proud to welcome so many student participants and to announce an impressive group of student awards.
